Examiner 's Amendment/Comment

Allowable Subject Matter

1. Claims 1-53 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art teaches or discloses methods and systems that allow the registrant of a plurality of domain names to view and directly manage the domain records corresponding to these domain names and to effect changes to these domain records in a DNS root server comprising a combination of: providing on a first computer a domain management function view of a graphical user interface, the domain management function viewing a listing of an active domain and a plurality of user selectable domain management functions, providing on a client machine a domain management function select screen listing a plurality of domain name, accepting a command from the client to modify and replace a first record/domain with a second record/domain and causing the records in the DNS root server to be substantially in agreement with the modified database records. The invention allows the efficient management of a number of domain names at once.

Drawings

3. The drawings filed on 4/27/2000 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. Furthermore, there is no "figure number" in a blank drawing of the

Art Unit: 2151

submitted drawings. Examiner assumes the drawing to be "*Figure 3*" because the specification of the instant application shows the Applicant's claim invention accordingly.

In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.
